PROFESSIONAL SUMMARY

Generative AI Developer with 2 years+ of experience in IT, focused on building LLM-powered applications and intelligent data processing systems for enterprise use cases. Experienced in using Generative AI and NLP techniques to extract, process, and deliver insights from complex structured and unstructured data sources. Worked on solutions such as ESG analytics and enterprise insights systems, improving data accessibility and supporting data-driven decision-making.

Skilled in designing robust data extraction and preprocessing workflows for multi-format documents, and optimizing system performance using parallel and asynchronous processing techniques. Experienced in leveraging Azure-based AI services to build scalable, production-ready solutions aligned with business needs. Prior experience includes working with SAP BusinessObjects for reporting and data modeling.

KEY SKILLS

- Generative AI
- Retrieval-Augmented Generation (RAG)
- Agentic AI
- Microsoft Azure (OpenAI, AI Search, Azure Functions, AI Foundry)
- Python
- LangGraph
- SQL & NoSQL databases (Mongo DB)
- Vector Search
- Pyspark
- Large Language Models (LLMs)
- Prompt Engineering
- Multi-Agent Orchestration Workflows
- Microsoft Copilot Studio
- LangChain
- Document parsing Tools (Unstructured.io)
- Vector Databases
- Embeddings
- Unix

TECHNICAL SKILLS

Programming & Frameworks

Python, SQL, Django

Cloud & AI Services (Microsoft Azure)

Azure OpenAI, Azure AI Search, Azure Functions, Blob Storage, App Services, Azure AI Foundry Agents and services, Microsoft Copilot Studio

GenAI, Orchestration & Automation

LLMs, Retrieval-Augmented Generation (RAG). Prompt Engineering, AI Agents & Multi-Agent Orchestration workflows, Document Ingestion and Retrieval Pipelines

Tools, Libraries & Datastores

LangChain, LangGraph, Unstructured.io, MongoDB, ServiceNow, Git, Linux / Windows administration (basic)

Machine Learning & NLP (Foundational)

Text Preprocessing, Word Embeddings, Text Classification & Summarization (POCs)

Management & Communication

Research & Development, Strategic Planning, Cross-Functional Collaboration, Team Leading and Coordination, Project Management, Client Communication

WORK EXPERIENCE

GenAI Developer, Infosys

02/2025 – Present
Hyderabad, India

- Designed and implemented **RAG-based solutions** and intelligent Q&A systems to enable contextual information retrieval from enterprise data sources.
- Built data extraction pipelines to process **unstructured and semi-structured data from PDFs, PPTs, and Excel files**, enabling efficient AI-driven analysis.
- Developed an **AI-driven ESG analysis solution** to extract and structure key sustainability metrics such as emissions and net-zero targets from large-scale documents.
- Solved complex data ingestion challenges by implementing **custom preprocessing workflows**, including converting PPT files to PDF format for consistent and reliable extraction.
- Optimized system performance using **parallel processing and asynchronous API execution**, improving efficiency for large document processing workloads.
- Integrated solutions with **Azure-based services and vector search systems** to support scalable retrieval and response generation.
- Collaborated with cross-functional teams to translate business requirements into **practical AI solutions** and ensure seamless integration into enterprise workflows.
- Engaged with stakeholders through demos and discussions to align deliverables with expectations and drive solution adoption.

SAP BO Developer, Tata Consultancy Services

02/2024 – 02/2025
Pune, India

- Developed and maintained business reports using **SAP BusinessObjects (BO)** to support data-driven decision-making across enterprise teams.
- Designed and implemented **data models using Universe Design Tool**, creating reusable objects for efficient reporting and analysis.
- Worked with business stakeholders to understand reporting requirements and deliver **customized reporting solutions**.
- Ensured data accuracy and consistency by validating report outputs and optimizing query performance.
- Collaborated with cross-functional teams to support reporting needs and integrate solutions within existing data workflows.

PROJECTS

LLM-Powered ESG Data Extraction Pipeline

- Engineered an **LLM-driven ESG analytics pipeline** to extract and structure predefined Environmental, Social, and Governance (ESG) measures from large, unstructured corporate documents including annual, environmental, and sustainability reports, enabling efficient retrieval of company-specific ESG insights.
- Implemented **Docling-based PDF parsing, hybrid chunking, and contextual ingestion**, followed by **declarative LLM-based extraction** to retrieve relevant information and generate structured responses for predefined ESG measure groups across fiscal years.
- **Technologies:** Generative AI, LLMs, Prompt Engineering, ESG Analytics, PDF Processing, Hybrid Chunking, Document Ingestion, Docling, Python, Azure Services

AI-Powered Climate Analytics

- Engineered an **LLM-driven Climate analytics pipeline** to extract and structure key sustainability metrics such as GHG emissions and net-zero targets from large, unstructured documents, enabling faster access to critical insights for enterprise use cases.
- Enhanced processing efficiency for high-volume documents by implementing **parallel processing and asynchronous API workflows**, significantly reducing execution time and improving scalability of the system.
- **Technologies:** Generative AI, Azure OpenAI, Prompt Engineering, PDF Processing, Asynchronous Processing, Parallel Computing, Azure Blob Storage, Azure Functions, Python, Docling, Pymupdf

AI-Powered Analytical Insights Assistant

- Developed an **LLM-powered analytics assistant** enabling natural language interaction to retrieve and interpret organizational metrics by combining structured enterprise data with unstructured external sources.
- Leveraged **NLP and Generative AI techniques** to enhance contextual understanding and response relevance, improving information accessibility and reducing manual effort for business users.

- **Technologies:** Generative AI, Azure OpenAI, Prompt Engineering, NLP, Data Integration, Azure AI Search, Python
- Meeting Intelligence & Action Tracking System, *Agentic AI POC***
- Designed a **multi-agent system** to process meeting transcripts and automatically extract key decisions, action items, and discussion highlights, improving visibility and reducing manual effort in tracking outcomes.
 - Implemented agent workflows for **context understanding, action item extraction, and task tracking**, enabling structured outputs and improving follow-up efficiency across teams.
 - **Technologies:** Generative AI, Multi-Agent Systems, Prompt Engineering, NLP, Azure OpenAI
- Enterprise Reporting & Data Modeling System (SAP BO)**
- Developed and maintained **enterprise reporting solutions** using SAP BusinessObjects, enabling business users to generate insights from structured data and support data-driven decision-making.
 - Designed and implemented **data models using Universe Design Tool**, creating reusable objects and optimizing queries to ensure efficient and consistent reporting across teams.
 - **Technologies:** SAP BusinessObjects (BO), Universe Design Tool, SQL

EDUCATION

Bachelor of Technology in Computer Science and Engineering,
MVGR College of Engineering

2019 – 2023
Vizianagaram, India
